

Corona epidemic: Significant disruption of our supply chains expected

Dear Premium Customers,

As already mentioned in our keynote in mid-February, there will be considerable delays to delivery in the coming weeks and months.

Some of the countries involved in our supply chain are planning drastic restrictions on the movement of goods. In some other countries, there are also significant logistical problems, as cases of Covid-19 have led to a lack of human resources in the logistics and shipping sectors. All of this at a time when the demand for [customized](#) immunization products has exploded.

As there is no relief in sight in the affected countries, we recommend that you place your orders and/or pre-orders well in advance, which will help our logistics department to plan as smoothly as possible. Thank you for your understanding. Please contact your Salvogene Consultant in case of an emergency.

This is the current situation as regards supply and delivery:

- Asia and Middle East: Deliveries halted until 15th April 2020.
- Europe: Greatly reduced all round. France, Germany and Scandinavia are experiencing delays of up to 4-6 weeks; deliveries to Italy, Switzerland and UK have been halted until further notice; deliveries to Spain will stop with effect from 1st April 2020.
- North America: USA slight delay of up to 1-3 weeks (forecast to get worse); Canada stopped until further notice; Central and South America (including Argentina and Brazil) deliveries halted; Mexico and Colombia slight delay of 1-2 weeks.
